

**Suicide in Idaho: Fact Sheet
September 2011**

- Suicide is the 2nd leading cause of death for Idahoans age 15-34 and for males age 10-14. (The leading cause of death is accidents.)
- Idaho is consistently among the states with the highest suicide rates. In 2007 (the most recent year available) Idaho had the 11th highest suicide rate, 28% higher than the national average.
- In 2010, 290 people completed suicide in Idaho; a 5% decrease from 2009, and a 15% increase over 2008.
- Between 2006 and 2010, 81% of suicides were by men.
- In 2010, 63% of Idaho suicides involved a firearm. The national average = 50%.
- 14.2% (1 in 7) of Idaho youth attending traditional high schools reported seriously considering suicide in 2009. 6.9% (1 in 14) reported making at least one attempt.
- Between 2006 and 2010, 72 Idaho school children (age 18 and under) died by suicide.
- It is estimated that suicide attempts in Idaho result in \$36 million in costs annually. Idaho's costs for suicide completions annually is over \$850,000 in medical care alone, and \$343 million in total lifetime productivity lost.
- In 2007, there were 34,600 deaths by suicide in the United States, an average of 1 person every 15 minutes.

Idaho Suicides by Region – 2010

Region	Anchor City	Suicides	Rate (per 100,000)	Population	Tot. # suicides	
					2006-2010	5-yr Avg Rate
1	Coeur d'Alene	53	25.0*	211,870	229	21.6
2	Lewiston	19	18.0	102,099	87	17.0
